

ALBERTO DANIEL TOVAR MENDOZA

Full-Stack JavaScript Developer | Node.js · Express · React · MySQL · Linux

Guadalajara, Jalisco, México | daniel.tovar@dannprod.com | +52 33 1249 3170

PROFESSIONAL SUMMARY

Full-Stack Developer with professional experience since 2019 building web applications and management systems with JavaScript, Node.js, Express, React, and MySQL/MariaDB. Experienced across frontend, backend, REST APIs, authentication, databases, Linux deployment, complex business rules, and modernization of existing systems.

PROFESSIONAL EXPERIENCE

Web Developer | University of Guadalajara (UDG) — CUCS
– Present

2022

- Develop and maintain institutional web applications across frontend, backend, and database layers.
- Developed CUCS's academic scheduling system, modeling relationships and business rules for courses, sections, NRCs, academic programs, departments, classrooms, instructors, contracts, workloads, and schedules, including conflict validation for instructors, classrooms, and time slots.
- Developed an end-to-end student schedule selection platform, including server configuration, Node.js/Express backend, authentication, validations, security, user interface, and database.
- Built systems for academic conferences and an international congress covering registration, access/attendance, workshops, evaluator workflows, and payment validation.
- Optimized existing and legacy applications while developing replacement solutions.
- Managed MySQL/MariaDB databases, including schema design and modifications, complex SQL queries, stored procedures, and backups.
- Analyzed institutional workflows and requirements to implement technical and operational improvements.

Freelance Developer | Client Projects

2019 – 2022

- Developed websites and web applications ranging from landing pages to registration, administration, and data management systems.
- Built solutions using JavaScript, HTML/CSS, PHP, Python, and relational databases, including data modeling, backend development, user interfaces, and PDF/Excel report generation.
- Handled client requirements, scope definition, deployment, maintenance, and incident resolution.

SELECTED PROJECTS

Minecraft Community Management Platform | Independent Project
· Node.js

React

- Built a React management platform for players, roles, bans, rewards, news, and real-time map visualization.

Interactive Twitch Bot | Independent Project

Python · SQLite · APIs

- Built a Python bot using Twitch and OpenAI APIs for moderation, chat interaction, commands, activity logging, analytics, and email reports.

TECHNICAL STACK

Frontend: React · JavaScript · Vite · React Router · Axios · HTML5 · CSS3 · Tailwind CSS · Bootstrap

Backend: Node.js · Express · Python · PHP · REST APIs · JWT/Auth

Databases: MySQL · MariaDB · SQLite · Advanced SQL · Stored Procedures · ORM

Infrastructure: Linux · Nginx · Bash · Docker (basic/currently learning)

Tools: Git · GitHub · GitLab

EDUCATION & LANGUAGES

Computer Engineering — Universidad Tecnológica de Guadalajara (UTEG), 2015–2019 · Coursework completed; degree process in progress.

English: functional technical reading · intermediate writing · basic/developing spoken English.
